

Mel Davin Solano

Backend Developer · Manila, Philippines

✉ davinsolano@gmail.com ☎ +63 906-348-3143 🔗 [LinkedIn](#)

👤 Professional Summary

Backend Developer and UP Diliman Computer Science graduate with extensive experience developing scalable web applications, serverless microservices, and enterprise automation platforms using Node.js, Express, Ruby on Rails, and ServiceNow.

📁 Work Experience

Backend Developer — Sysplex IT Solutions

Sep 2023 – Dec 2023

Architected robust server-side infrastructure, optimized relational database query logic, and deployed high-performance RESTful API microservices.

ServiceNow Developer — GECO Asia

Sep 2022 – Mar 2023

Built client scripts, business rules, and custom workflow automations across enterprise ServiceNow platform modules for regional clients.

Developer — Podcast Network Asia (Podmachine)

Jan 2022 – Jun 2022

Engineered backend components for Podmachine, optimizing audio processing services, user data workflows, and third-party API integrations.

Full Stack Developer — CloudSwyft Global Systems

Jul 2021 – Oct 2021

Integrated cloud-based learning management tools, API authentication flows, and automated provisioning services for enterprise EdTech platforms.

Junior Analyst — Technomancer (Quantagoods)

Jan 2021 – Jun 2021

Analyzed backend data architecture, designed database schemas, and supported inventory management workflows for Quantagoods.

Software Developer — Monstronauts Inc

Mar 2020 – Sep 2020

Maintained game logic server handlers, internal toolings, and backend services for mobile titles.

Backend Developer — Supergene Global Services

Feb 2018 – Feb 2020

Designed high-concurrency game server APIs for the Facebook Instant Games platform, maintaining state management for millions of daily active users.

🔧 Technical Skills

Languages: JavaScript (ES6+), C, C#, Ruby

Backend & Frameworks: Node.js, Express.js, Ruby on Rails, ServiceNow Scripting

Databases & Tools: MongoDB, SQL, Git, RESTful APIs, System Architecture

Certifications & Credentials

Data Science Certificate

Jul 2021 · No Expiration

Specialized training in data analysis techniques, data pipelines, and quantitative analytics from CloudSwyft Global Systems.

Credential ID: acc.N1b4nT98

 **Verify Certificate on Credential.net** →

Ruby on Rails Certification

Issued 2026 · No Expiration

Advanced application architecture, MVC design patterns, ORM database integrations, and automated testing in Ruby on Rails from Alison.

 **View Certificate PDF 1** →  **View Certificate PDF 2** →

ServiceNow Certified System Administrator (CSA)

Issued 2023 · No Expiration

Proficient in ServiceNow platform configuration, client scripting, business rules, and workflow automation.

 **ServiceNow Profile & Credentials** →

Education

Bachelor of Science in Computer Science

Jun 2013 – Jun 2018

University of the Philippines Diliman

Comprehensive foundation in Software Engineering, Data Structures, Algorithms, and System Architecture.

Key Projects

Podmachine — Podcast Network Asia

AI-powered podcast production platform. Engineered scalable API endpoints and backend services.

Visit Podmachine →

Quantagoods — Technomancer

E-commerce logistics & inventory platform. Built relational database schemas and order processing flows.

Visit Quantagoods →

CloudSwyft Academy — CloudSwyft Global Systems

EdTech learning management system backend integration and user authentication services.

Visit CloudSwyft →

Facebook OMG Quiz App — Supergene Global Services

High-concurrency instant game API supporting millions of active daily users.
